

# IT Innovation for Medical Lab and Phlebotomist

## PhlebeeLab

*Lab ordering on Mobile, works online and offline*

### SECURE SAMPLING

- Order is created with patient complete ID (QR Code or equivalent).
- Tubes and patient are associated.
- No more writing.
- Test guide always synchronized.
- Determine tube's color based on selected tests.

### TRACEABILITY

- Phlebotomist ID.
- Sampling Timestamp.
- Timestamp of sample drop-off.

### WORKS ALSO WITH APPOINTMENT

- Appointment entered on a Web Interface.
- Use the phone GPS with one single touch.
- Integrates external appointment if needed.

### WIN TIME

- Order received in real time through mobile network.
- Verify order hours before tubes arrival.
- Anticipate analytical activity.

- ✓ Receive patient information in real time and automatically create order in your LIS.

**SIL-LAB**  
innovations

- ✓ PhlebeeLab is the first mHealth cloud mobile lab ordering platform that also capture data from mobile IVD Devices and send them to the medical lab!

- ✓ No more writing to do - the app works with the voice recognition of the mobile phone.
- ✓ Phlebotomist ID and sampling timestamps are automatically filled in by the application itself which improves ISO-15189 compliance.
- ✓ The medical order (paper) is scanned using the mobile phone camera.

- ✓ To create a new request, one just has to scan a unique patient's ID (barcode or QR Code).
- ✓ Once validated, the dematerialized file is sent to lab using wifi, 3G or 4G.
- ✓ Works online and offline and synchronizes upon network detection without user interaction.
- ✓ Sampling guides and test catalogues are directly accessible in the smartphone and can be updated by the laboratory in real time.

### Mobile Order Entry solution for laboratories

Works off-line and synchronizes upon network detection

- ✓ Phlebeelab is a Software as a Service (SaaS) platform with prices based on a pay by order transmitted to the Lab. Unit price is based on the monthly volume. No investment needed.
